

Object to the proposed use of cell phones on aircraft because 1)there is no hard evidence usage DOES NOT interfere with navigational equipment. 2) cell phone use would allow terrorists to better co-ordinate their actions. 3) Flight Attendants would have to police the cabins, comprising our primary function as safety specialists. This is by the very nature of the wording of the NPRM. 4) It would make an already tense cabin environment more tense.

CAN YOU HEAR ME NOW???????????

Thank you.

Jane P. Hutchison
Flight Attendant
PSA Airlines
